PET PANEL

Why **PET** Panels?

High Acoustic
Performance

High Resistance to
Humidity & Moisture

Easy Installation &
Maintenance

Made from Polyester
Fibre

Flame Retardant

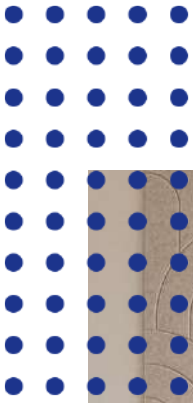

Light-Weight & Flexible

APPLICATIONS

Modern Panels for Modern Spaces

Bollard specializes in high-performance PET Acoustic Panels, available in 9 mm and 12 mm thicknesses to suit various sound absorption needs. We solve the common industry struggle of long wait times by offering faster delivery through our high capacity manufacturing.

What sets us apart is our advanced CNC cutting capability, allowing for intricate designs and total customization. Whether you need specific shapes, patterns, or sizes, our panels offer the flexibility to match any architectural vision.

By choosing Bollard, you get a versatile, stylish, and effective acoustic solution designed to eliminate noise while fitting your project's exact requirements perfectly.

ECO FRIENDLY PROCESSING

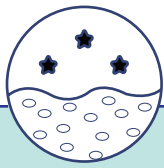

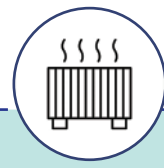

Soft drink and detergent bottles made from PET identified by are collected from consumers.

Contaminants like lids and sticky labels are removed. Bottles are chipped into tiny pellets.

Pellets are washed and sanitized.

Pellets and color are fed into a hopper. a heater at the base of the hopper melts the pellets to form a free flowing resin.

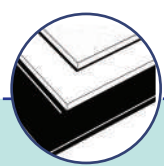

Resin is pumped through a sophisticated shower-rose device, known as a spinneret.

Cold air fans set the fine fibres extruded from the spinneret.

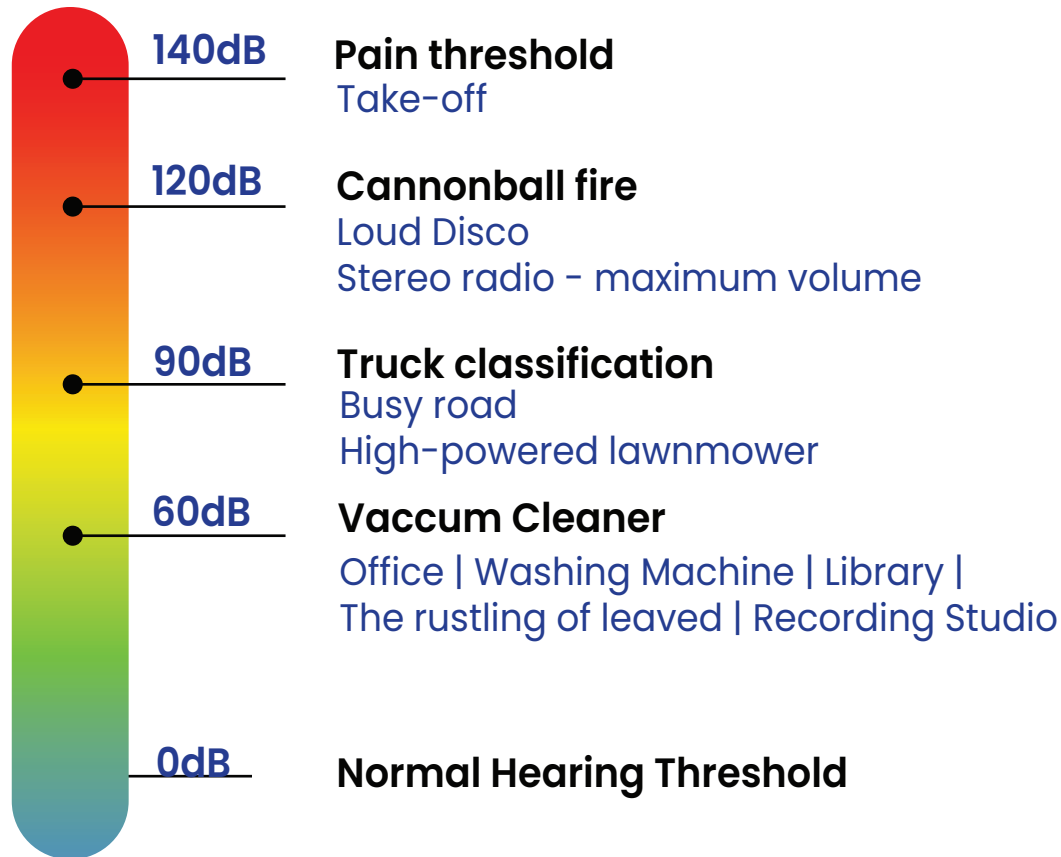

Fibres are drawn and cut and are blended into a web.

Web is compressed and cut ready for use.

WE CARE ABOUT ACOUSTICS!

How About You?

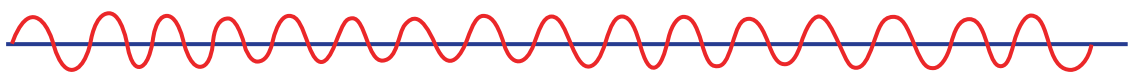

Low Tones Low frequency | Long wave | <90Hz | e.g. HVAC, vowels

Mid Tones Speech frequency | Mild Wave | <90-300Hz | e.g. speech, vowels

High Tones High frequency | Short Wave | <300-12000Hz | e.g. HVAC, consonants
